7315-31
WIRELESS TRANSMITTER
OPERATION MANUAL

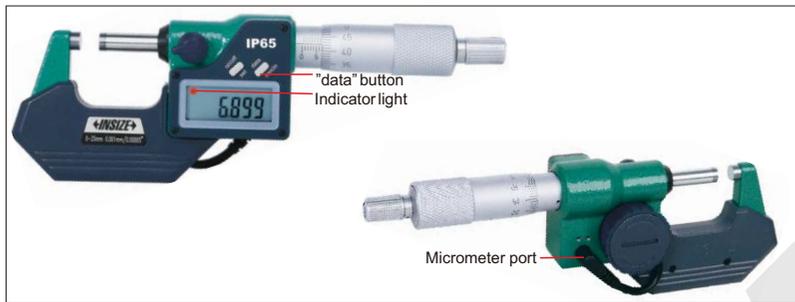

Introduction

7315-31: Wireless transmitter, connected with our micrometers, used with our 7315 series receivers to transmit the measured values of the micrometer to the computer. A unique serial number is printed on the side of each transmitter

Connecting micrometer

Connect Operation

1 Install the battery:

Remove the battery cover on the transmitter by turning 45° counterclockwise with a wrench, and install the CR2032 battery (3V). With the positive pole facing upwards, use a wrench to rotate 45° clockwise to lock the battery cover on the transmitter

Install the battery with the positive pole up

The battery cover wrench slot is aligned with the raised dot on the edge of the cover and put into the cover, which can be locked by clockwise rotation

2 Connection mode with micrometer :

Use a wrench to rotate the battery cover of the micrometer counterclockwise by 45 degrees. Be careful not to take out the battery of the micrometer. Rotate the transmitter clockwise by 45 degrees and install it on the micrometer. Insert the earphone plug into the interface of the micrometer

3 transmission mode:

Press the "data" key of micrometer: press the key lightly to match with the receiver. After successful matching, data collection will be triggered, and one data will be sent each time. (Please refer to the receiver manual for details)
